DETAILED ACTION

Response to Amendment

The objections to the specification and the claim have been obviated in view of the amendment filed 12/27/02.

The claim rejection under 35 USC §112, 2nd paragraph has been obviated in view of the amendment filed 12/27/02.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/12/03 has been entered.

Election/Restrictions

Applicant is reminded of the restriction/election requirement in paper number 3 and applicant's election in paper number 4.

Claim Objections

Claim 10 is objected to because of the following informalities: Claim 10 lacks a period at the end of the claim. Appropriate correction is required.

Art Unit: 3763

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Connell (U.S. Patent No. 6,098,617).

Connell discloses a feeding tube and CO2 detecting machine combination comprising a feeding tube for insertion in the patient and a proximal portion outside the patient. A CO2 machine which is operably connected to the proximal portion of the tube such that exhaled/expired CO2 is detected. The fixture is considered to be the 62,79,84 or 88. Connell discloses a line/ fixture which is connected to a capnograph (CO2 detecting machine) for detecting and monitoring the CO2 levels. In another interpretation the fixture can be considered the flared portion 36. In figures 4 and 6 the bifurcated body is considered to be the exhalant and inhalant lines/legs which are connected to the fixture 36. With respect to the term "feeding" the Examiner is considered the administration of the gas (such as O2) to be enable the device of Connell as a feeding tube in the broadest interpretation.

With respect to claim 10. The tubular segment can be considered as the tubular member and the connector (such as 88) shown in figures 4-6 to be the intermediate coupling member for connecting the fixture to the machine.

Allowable Subject Matter

Claim 16 is allowable over the prior art of record.

Response to Arguments

Applicant's arguments with respect to claims 4-5,7-11,15 have been considered but are moot in view of the new ground(s) of rejection.
